Affadivit of Mark Jaworski
Indiana Department of Environmental Management
Project Manager

On Thursday, May 22, 2008, I spoke to Brian Freeny, with the US.EPA, Region V, by telephone. He mentioned that the Dupont Corporation, located approximately ¼ mile upstream to the USS Lead facility, was a manufacturer and a packager of inorganic pesticides (i.e. lead arsenate). Several waste management units have been established on site. A slurry wall has also been completed on site to address any on site ground water issues. The facility is currently undergoing RCRA Corrective Action activities.
